Designed strictly for new students and current white belts. Our program of the martial arts is an education-based curriculum where character building, leadership skills, goal setting and constant, never ending improvement all play vital roles. In addition to learning traditional techniques of the martial arts, children are also taught the importance of respect, self-confidence, self-esteem and anger management. We strive to provide each student with a positive image on how they behave in the dojo (training hall), home and school. The introduction program is designed to prepare each student for yellow belt training so that they can further their martial arts skills in our year round colored belts program.
